

A close-up photograph of several ripe, golden-yellow apples resting in a light-colored plastic basket with a grid of oval-shaped holes. Some green leaves are interspersed among the apples. The lighting is bright, creating highlights on the smooth skin of the fruit.

Ventilated Film

Ventilated wrapping for use where air circulation is required

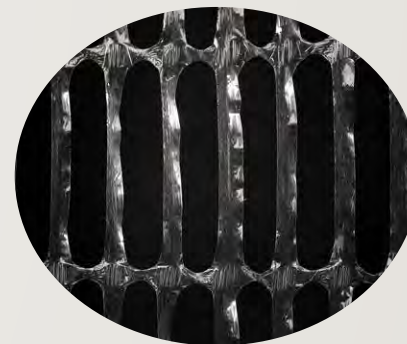

Macro-perforated stretch film has several advantages compared to conventional stretch film when fastening loads on pallets, such as lower environmental impact and technical advantages over meshes or other solutions. But its main competitive advantage, especially compared to conventional film, is that it allows ventilation of the pallet load.

Load ventilation prevents moisture condensation resulting from temperature changes between production and storage areas in customers' premises.

Stays fresh longer!

Stretch up to 250%

Pre-Stretched

Key Features:

- Cardboard boxes are not damaged or deformed by moisture
- Product labels do not peel off or shift
- Reduced or eliminated oxidation of metal cans
- Lower growth of fungi and bacteria
- Products requiring oxygenation do not lose quality
- Store and staff do not get wet during the unpacking process
- Fast cooling
- Fast freezing
- Elimination of condensation

CODES	PRODUCT DESCRIPTION	APPLICATION	WIDTH (mm)	LENGTH (mtr)	STRETCH %	U.O.M	PALLET QTY
82560013	Ventilated Film PLUS	Machine Roll	500	1,200	250	ROLL	40
82550063	Ventilated Film 20	Machine Roll Pre-Stretched	420	3,500	20	ROLL	32
82570043	Ventilated Film 40	Machine Roll Pre-Stretched	500	3,000	40	ROLL	24
82550042	Ventilated Film 20	Hand roll	420	500	20	ROLL	144

Air Flow

Allows up to 60% air circulation, preventing condensation

Elongation

Available in Pre-Stretched and Conventional grades with up to 250% elongation

Soft on Corners

Soft on carton corners preventing crushing

Strength

Maximum strength and stretch allowing containment of heavy loads

Food Safe

Made from virgin polymer food safe material

Protection

Secures the load and keeps it whole for all the length of the harshest journey

Versatility & Adaptability

Adaptable to most existing wrapping machines and brake systems

Even Cooling

Holes allow the product to cool evenly and remain at the same temperature throughout the pallet

Environmentally Friendly

Tama Ventilated Film will get you more wrapped loads per roll, less waste, and is totally recyclable

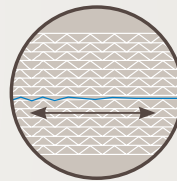

PRO - Series

ElastiNet Pro

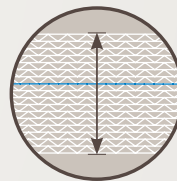

The netting with the NDicator for checking elongation

The new & improved elastic net! Keeps its original width, enlarges wrapping surface and gives you more for less! ElastiNet® Pro is suited for both agricultural and industrial settings due to its aggressive memory and superior allowance for uninhibited air circulation.

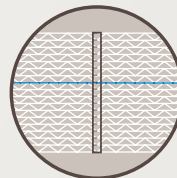

NDicator

The built-in visual elongation pointer

X-SPAN Technology

Width keeping - for reducing wraps

More lines

Denser net for better load holding

The net with
reflex action

Air Flow

All of Tama's pallet nets allow nearly 100% air circulation

Elongation

ElastiNet® Pro comes with guaranteed 15% elongation in normal conditions, resulting in many more wrapped loads.

Width Keeping

ElastiNet® Pro maintains its original width when the optimal stretch is applied, allowing better stability of the load, less wraps for more wrapped pallets and faster wrapping cycle - saving time and money!

Strength

ElastiNet® Pro grips every corner and curve, compensating for gaps and bridges over them, most suitable for uneven loads.

Versatility & Adaptability

ElastiNet® Pro can be used for all types of shipments in hand wrapping or machine applications, and is adaptable to most existing wrapping machines and brake systems.

Environmentally friendly

ElastiNet® Pro will get you more wrapped loads per roll, less waste, and is totally recyclable.

Savings

The whole package: faster wrapping, extra security, higher length per roll, wider net to save you money

Protection

ElastiNet® Pro keeps the shipment integrity in the harshest shipping conditions.

CODE	DESCRIPTION	APPLICATION	WIDTH (mm)	LENGTH (mtr)	STRETCH (%)	U.O.M	PALLET QTY

PRO - Series

FlexNet Pro

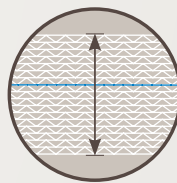

Airflow | Stability | Elasticity

FlexNet® Pro offers more elongation than ElastiNet® Pro, which provides greater stability in uneven pallets, such as turf and onion bags. FlexNet® Pro allows perishable products to breathe and overcomes problems of condensation, sweating, mould and overheating during packing, refrigeration and transport.

**The net with
built-in memory**

Air Flow

All of Tama's pallet nets allow nearly 100% air circulation

Elongation

FlexNet® Pro comes with guaranteed 33% elongation in normal conditions, resulting in many more wrapped loads.

Width Keeping

FlexNet® Pro maintains its original width when the optimal stretch is applied, allowing better stability of the load, less wraps for more wrapped pallets and faster wrapping cycle – saving time and money!

Built-in Memory

To provide superior load retention, after stretching, FlexNet® Pro snaps back and retracts almost all the way to its original length.

Strength

FlexNet® Pro grips every corner and curve, compensating for gaps and bridges over them, most suitable for uneven loads.

Versatility & Adaptability

FlexNet® Pro can be used for all types of shipments in hand wrapping or machine applications, and is adaptable to most existing wrapping machines and brake systems.

Environmentally friendly

FlexNet® Pro will get you more wrapped loads per roll, less waste, and is totally recyclable.

Savings

The whole package: faster wrapping, extra security, higher length per roll, wider net to save you money

Protection

FlexNet® Pro keeps the shipment integrity in the harshest shipping conditions.

Tomato and Vine Twine

Tama Australia offer Kinnears tomato trellis and vine twine that is suitable for a range of plant tying and training applications.

Kinnears Tomato Trellis Twine is conveniently packaged in easy to use pre-cut lengths, to assist the professional tomato producer.

One measured cut provides 50 identical lengths.

Manufactured by Tama, Kinnears Tomato Trellis Twine is specifically formulated for Australian conditions.

Conveniently packed Vine Twine with each pack containing 6 spools of 1,625m ensures a light weight and easily carried spool for every application'

NEW CODE	PRODUCT/BRAND	COLOUR	LENGTH/ PACK	SPOOLS / PACK	PACKS / PALLET

Over Row vine netting has been developed as a single row drape over net and multi row net. We stock a full range of sizes in 30gsm diamond weave, with a unique raschel stitch to improve strength and prevent runs. Other weights and sizes are available upon request.

- 16mm Diamond hole, 30 gram / m²
- Packaging - knitted shade cloth bag with draw string.
- Monofilament construction.
- UV stabilised - 10 season manufacturers UV warranty.
- Contrasting black or white centre and edge markers.
- Made to order service available including edge ropes.

**ADDITIONAL SIZES AND WEIGHTS OF VINE, STRUCTURAL AND CROSSOVER NETS ARE AVAILABLE AS
'MADE TO ORDER' - PLEASE CONTACT US FOR MORE INFORMATION**
